

Clippard

Low Power High Flow Great Value

Clippard Minimatic® electronic valves are precision-built utilizing a unique, patented valving principle. Proven to over a billion cycles, it is a deceptively simple design that set the industry standard for life and reliability.

Based on the tried-and-true design of the original EV line, the next generation **DV Series** is a versatile electronic valve that provides exceptionally high flow rates of up to 100 l/min and features a life of over a billion cycles.

Maximize Flow, Minimize Cost

Contact your distributor today to learn more about how to better optimize power, flow and cost in your application with the new DV Series, or visit us online at clippard.com to request more information.
