

Clippard's EGV Series valves are an electronically piloted version of the GV series valves, ideal for large flow, low leak applications. Available in G1/8 ported and manifold mount, they utilize Clippard 10 mm or 15 mm valves, and offer numerous voltage and connection options. These 2/2 and 3/2 valves provide 10 times more flow than Clippard's MAV series and 2.5 times more flow than the MJV series! An externally piloted option is available for controlling lower pressures or other media.

- Small, compact, lightweight with high flow
- Electroless nickel plated brass and hard coat anodized aluminum construction for long life and corrosion resistance
- Proven poppet design
- Large variety of control voltages and connections
