# **ES SERIES** ELECTRONIC VALVES

The ES series features large cross sectional o-rings, minimal leak points, and proven poppet designs. To reduce the possibility of contamination, all mounting hardware is located outside of the flow path and no internal parts are threaded during assembly. The ES has the best performance-to-price ratio for low leak valves. The compact footprint coupled with the long life, and exceptional leak resistance make the ES line suited to improve reliability in a wide range of applications.

| Coil Resistance          | 144 (12V), 576 (24V)   |
|--------------------------|--|
| Connection               | Top terminal pins or radial wire leads                             |
| Current                  | 0.083A (12V), 0.042A (24V)   |
| Cycle Life               | Over 1 billion   |
| Filtration (recommended) | 40 micron  |
| Function                 | 2-way bidirectional; 3-way normally-closed or universally ported   |
| Leak Rate                | 0.01 sccm  |
| Material, Body           | ENP carbon steel, nickel iron alloy,<br>300 series stainless steel |
| Material, Seals          | Nitrile standard; FKM and EPDM available                           |
| Material, Spring         | Nickel alloy   |
| Material, Wetted         | Nickel alloy, stainless steel, ENP steel                           |
| Max. Flow                | 17 l/min @ 100 psig (7 bar),<br>14 l/min @ 50 psig (3.5 bar)       |
| Max. psig                | 105 (7.2 bar)  |
| Medium                   | Clean, dry air and compatible gases                                |
| Mount                    | Manifold   |
| Number of Ports          | 2 or 3   |
|                          |  |

Dimensions shown are in inches (millimeters listed in parentheses).

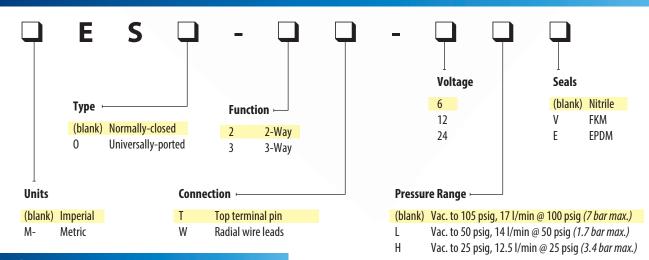

Visit clippard.com for more detailed 2D and 3D drawings.

- · Ideal for ultra low leak applications
- · No threads in flow path
- No anaerobic sealant
- Fast response—5 to 10 ms, nominal
- Close mounting—7/8" (22) on center, <1" (25.4) tall

# ORDERING INFORMATION

0.69" (17.5)
