CLIPPARD INTRODUCES NEW 9/16" BORE STAINLESS STEEL CYLINDER SERIES

Cincinnati, Ohio -- Clippard Instrument Laboratory announces the new 9/16" bore stainless steel cylinder. Available in stud or universal mount, double, single or reverse acting, rotating or non-rotating rod, with standard stroke lengths up to 4". This new cylinder comes complete with all of the standard features found on Clippard's other stainless steel cylinder sizes, including:

- * Polished I.D. stainless steel tubes
- Precision rolled construction
- * Machined aluminum heads
- * Sintered bronze bushing
- * Ground, polished and roller burnished 303 stainless rods
- * Full piston breakaway
- * Buna-N "U"-cup piston seals
- * Buna-N "U"-cup rod seals

For complete details on this new 9/16" bore and all other Clippard products, including all options and mounting hardware, visit www.clippard.com/cylinders, or call 1-877-245-6247.
