

Clippard

Clippard Announces “Wrapped & Ready” Stainless Steel Cylinder Initiative

*Continuous Flow Manufacturing (CFM) Process Expanded.
Huge Inventory Available.*

Cincinnati, Ohio -- With increased market demand for stainless steel cylinders, Clippard Instrument Laboratory has responded by expanding their Continuous Flow Manufacturing process for stainless steel cylinders at their Cincinnati, Ohio production facility. This process ensures efficient production of Clippard's high quality stainless cylinders, enabling thousands of sizes to be guaranteed “Wrapped & Ready” for same-day shipping, and others to be available to ship in just 2 to 3 days. As part of this process, Clippard has also made available a unique on-line conversion tool for easy competitive cylinder interchanges.

For more information about these cylinders or any of Clippard's 5,000 other standard pneumatic products, call 513-521-4261 or visit www.clippard.com.
