10 MM STANDARD SERIES

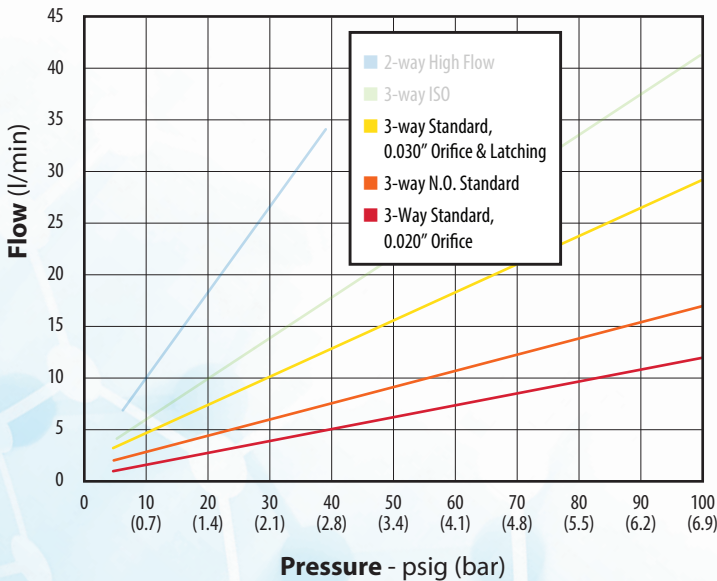

Actual Size
10 mm
with 90° connector

Clippard's 10 mm valves utilize plunger valve technology, a proven reliable design that is ideal for less demanding applications that require fast response times and relatively long life at a great price. Available in normally-open or normally-closed versions, these 2-way and 3-way valves feature a high strength, lightweight glass-filled nylon body and are suitable for a broad range of uses. This versatile miniature valve is a smart choice for applications across many different industries where compact, electronically-controlled pneumatics are needed.

TYPICAL FLOW

Coil Insulation Class	F 311°F (115°C)
Connector	In-Line Connector with LED 90° Connector with LED Wire Leads
Cycle Life	>50,000,000 (ideal applications)
Function	2-way normally-closed, 3-way normally-open or normally-closed
Manifold	Standard (See pp. 20-21 in brochure)
Material	Stainless steel core and springs, nylon body, ENP brass, FKM dynamic seals, nitrile gasket and static seals
Max. Flow	0.020" Orifice: 13 l/min @ 100 psig (7 bar) 0.030" Orifice: 30 l/min @ 100 psig (7 bar)
Medium	Air, gas, or other compatible fluids
Mount	M1.7 screws (x2)
Nominal Orifice Size	0.020" (0.5 mm), 0.030" (0.8 mm)
Operating Pressure Range	0 to 100 psig (7 bar) Consult Clippard for different pressures
Operating Temperature Range	14 to 122°F (-10 to 50°C) If below 32°F (0°C), must use clean, dry air
Power Consumption	0.6 or 1.3 watts Dependent on orifice size and pressure
Response Time	0.6 W: 10 ms nominal 1.3 W: 8 ms nominal
Voltage	12 or 24 VDC
Voltage Tolerance	±10%

10 MM LATCHING SERIES

Actual Size
10 mm
with wire leads

Latching valves consume less energy and produce less heat than standard solenoid valves when used in extended duty cycle applications, since the coil is energized for only a small fraction of the total duty cycle. A short pulse of current opens the valve, which “latches” open indefinitely after the current stops. A subsequent pulse of current in the opposite direction closes the valve.

Coil Insulation Class	F 311°F (115°C)
Connector	Wire Leads
Function	2-way or 3-way normally-closed
Manifold	Standard (See pp. 20-21 in brochure)
Material	Stainless steel core and springs, nylon body, ENP brass, FKM dynamic seals, nitrile gasket and static seals
Max. Flow	30 l/min @ 100 psig (7 bar)
Medium	Air, gas, or other compatible fluids
Mount	M1.7 screws (x2)
Nominal Orifice Size	0.8 mm (0.030")
Operating Pressure Range	0 to 100 psig (7 bar) <i>Consult Clippard for different pressures</i>
Operating Temperature Range	14 to 122°F (-10 to 50°C) <i>If below 32°F (0°C), must use clean, dry air</i>
Power Consumption	2.0 watts
Response Time	10 ms nominal
Voltage	12 or 24 VDC
Voltage Tolerance	±10%

10 MM ISO SERIES

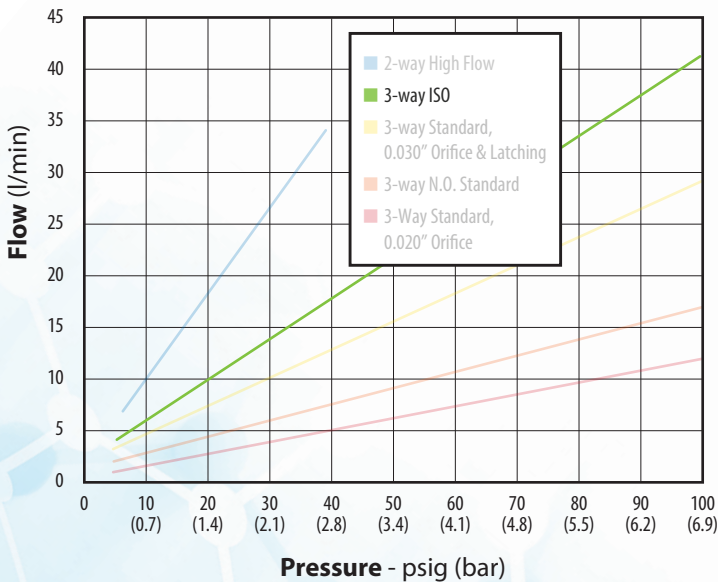

Actual Size
10 mm with 90° connector

Clippard's ISO Series valves are designed to conform to the ISO 15218 standard for mounting and port locations. This series also comes with a built-in hit and hold circuit which allows for a higher flow rate and lower holding power consumption than any of the other 10 mm valve series. With exceptional cycle life and reliability, the ISO Series is a smart choice for high performance applications.

E2S SERIES ISOLATION VALVES

Connector	11.8" (30 cm) wire leads
Flow Range	15 to 30 l/min
Function*	2-way normally-closed isolation (<i>monodirectional</i>)
Material, Body	Nylon
Material, Seals	EPDM
Material, Wetted	Glass-filled nylon, EPDM
Max. Flow	30 l/min
Max. Temperature of Coil	311°F (155°C)
Medium	Air, water, gas, or compatible fluids
Mount	M2x14
Operating Pressure Range	0 to 36 psig (2.5 bar)
Operating Temperature Range	14 to 122°F (-10 to 50°C) <i>Must use clean, dry air when <32°F (0°C)</i>
Response Time	6 ms
Voltage	12 to 24 VDC
Wattage	1.3 to 2.8 watts
More Details	clippard.com/link/e2s

*Always less than 2 psig (0.1 bar) backpressure on outlet port for proper function.

The E2S series valve combines the versatility of Clippard's compact 10 mm valve line with the advantages of media isolation. With a durable, glass-filled nylon body and an EPDM diaphragm that separates the actuation mechanism from the flow path, the E2S series is an excellent choice for dispensing a wide range of aggressive gases and liquids in applications that require compact, electronically-controlled valves which have minimal backpressure. Applications include printing equipment, medical diagnostic devices, dental equipment, fermentation, water treatment, dispensing, and more.

15 MM STANDARD SERIES

Actual Size
15 mm
with DIN connector

Clippard's line of 10 and 15 mm valves are perfect for applications where compact, electronically-controlled pneumatics are needed. Available in normally-open or normally-closed versions, these 2-way and 3-way valves feature a high strength, lightweight glass-filled nylon body and are suitable for a broad range of uses. With exceptional cycle life and reliability, this versatile miniature valve is a smart choice for applications across many different industries.

PRECISION CONTROL SOLUTIONS

ELECTRONIC VALVES

Clippard revolutionized the electronic valve market in the early 1970s with the EV series, which quickly became the industry standard for life and reliability. This unparalleled history in providing new and innovative products continues today, aided by advanced manufacturing machines and techniques.

clippard.com/link/elec-valves

PROPORTIONAL VALVES

For optimal controllability, proportional valves provide output proportional to input. These types of valves are ideal for applications which require variable flow control.

clippard.com/link/prop-valves

ISOLATION VALVES

Media isolation valves are used for a wide variety of applications, including those that require precise, repeatable dispensing for medical and analytical instrumentation. Choose from a large variety of sizes, configurations, materials, and options or contact us to discuss special customizations.

clippard.com/link/isolation-valves

CONTROL VALVES

From flow controls to needle valves, check valves, shuttle valves, exhaust valves and more, Clippard's control valves are available in a wide range configurations and functions. Sizes range from #3-56 and #10-32 through 3/8" NPT, for pressures up to 300 psig.

clippard.com/link/control-valves

DIRECTIONAL CONTROL VALVES

Clippard's line of mechanically-operated directional control valves includes toggle, stem, and lever valves as well as hand and foot-actuated pedal valves, palm button valves, and more. Choose from #3-56, #10-32, 1/8" NPT or 1/4" NPT ports.

clippard.com/link/directional-valves

AIR PILOT VALVES

The force output of an air pilot is much more powerful than the power produced from electrical solenoids or actuators. This makes air pilot valves ideal for applications where higher air flow and/or lower power are required, as well as when simplicity and cost savings are important.

clippard.com/link/air-pilot-valves

ELECTRONIC CONTROLS

Clippard's Cordis series is a highly-customizable line of electronic controls designed to help close the loop around pressure and flow. With unparalleled accuracy and resolution, this line will elevate your application to the next level. Take control like never before with the Cordis.

clippard.com/link/elec-controls

PRESSURE REGULATORS

Regulators are offered in either relieving or non-relieving versions with a large variety of adjustment options and mounting styles to choose from. For even greater precision control, check out Clippard's Cordis line of electronic pressure regulators.

clippard.com/link/press-reg

CUSTOM SOLUTIONS

Clippard excels at designing special variations, modifications, and completely custom valves, fittings, and assemblies. If you need a product that fits your application perfectly, we will work with you to design or modify products to suit your exact needs.

clippard.com/link/custom

AIR PREP EQUIPMENT

Pneumatic applications with properly conditioned air will operate longer, cost less, and improve system efficiency. Clippard's line includes filters, regulators, lubricators, and combination units from #10-32 up to 1". A modular design and interconnecting hardware simplifies installation and maintenance.

clippard.com/link/air-prep

FITTINGS

Small in size but large in performance, Clippard precision fittings are designed to save you time, space, and money when designing versatile, efficient, trouble-free circuits. Choose from an endless variety in several different styles including push-quick, slip-on, barb, and quick connect.

clippard.com/link/fittings

HOSE & TUBING

Choose from a large variety of miniature hose and tubing, including copper and nylon tubing, flexible urethane and vinyl hose and tubing, and food-, medical-, or laboratory-grade silicone tubing.

clippard.com/link/tubing

Clippard products are distributed through our worldwide network of sales and engineering specialists. All of our representatives are stocking distributors and keep a variety of Clippard products on hand to fill your immediate needs. Each of our distributors are backed by our own large inventory to ensure quick delivery.

To locate your nearest distributor, call 877-245-6247 or visit clippard.com/distributors
