

# PACKAGING SOLUTIONS

For more than 60 years, Clippard has provided quality products for industry, including packaging applications - from conveying to palletizing - filling to sealing - even controlling the processes for each of these tasks. Clippard's product range has expanded to fit more and more packaging

requirements, including a full line of directional control valves and Filter-Regulator-Lubricator products. The Maximatic® line of valves and FRLs is ideally suited to this industry. In addition, Clippard provides corrosion resistant cylinders, and a host of specialty and miniature Minimatic® components to provide unique solutions for the packaging industry.

## Clippard Provides

Air Cylinders

Electronic Valves

Control Valves

10 mm & 15 mm Valves

Filter-Regulators-Lubricators

Fittings & Tubing

## Distributed By

### Clippard Instrument Laboratory, Inc.

7390 Colerain Avenue • Cincinnati, OH 45239

877.245.6247 ~ 513.521.4261

# PACKAGING WITH PNEUMATICS

A leader in miniature pneumatics, Clippard provides the packaging industry a variety of products and solutions. We understand the needs of this industry, and are prepared to serve you with our expanding product lines and expertise in applications.

# Clippard

# MAXIMATIC® VALVES & FRLS

Clippard's line of Maximatic products consist of pneumatic valves and air preparation equipment that provide high reliability and cost effective solutions – IN STOCK!

- Solenoid Controlled and Air-Piloted Directional Valves
- #10-32 to 1/2" Port Sizes
- Multiple Voltages
- Qualified per ISO 19973-2:2007

- Filters, Regulators, Lubricators
- #10-32 to 1" Port Sizes
- Modular Joining System
- Lock-Out Valves
- Bowl Options
- Fast Delivery!

# CYLINDERS

- Cost effective control of forces from 1 to 1,500 pounds
- Stainless Steel Rod, roller burnished for long life
- Stainless tube, anodized heads and caps
- Corrosion Resistant models

# FITTINGS

Clippard offers a complete line of fittings and tubing. Our Push-Quick fittings are a push to connect type that seal on the tube OD and are suitable for use with most commonly used types of flexible tubing. These easy to use fittings are available in both imperial and metric sizes and range in thread sizes from 10-32 to 1/2" NPT and tubing sizes 1/8" to 3/8" OD.

Our Minimatic line of miniature fittings is a "barb" type design that is comprehensive, compact and cost effective. They are extremely useful in tight places and will hold our urethane tubing to the burst pressure of the tubing. We also offer flexible tubing in polyethylene and nylon.

*Design Solutions for the Packaging Industry:*

- *Conveying Applications*
- *Case Erectors*
- *Process Solutions*
- *Bottle/Container Filling*
- *Palletizing*
- *Controls for a Variety of Applications*
