MAR-1 Series Miniature Pressure Regulators

Relieving & Non-Relieving Versions

When Clippard introduced a miniature regulator in 1962, the MAR-1 became very popular as a **simple, robust, and cost-effective** regulator in a small package with **exceptionally long life**. As regulator applications continue to increase, Clippard is meeting the demand with a variety of new models, options and improvements.

Regulators are offered in either relieving or non-relieving versions. The relieving design maintains a constant pressure output even when downstream conditions change, while non-relieving regulators do not automatically compensate for changes in downstream flow or pressure. There is no vent to atmosphere, as in a relieving type regulator, and the output pressure can increase due to a downstream event. Non-relieving versions can accommodate compatible liquid applications.

New Mounting Configurations

NEW Cartridge Mount Option

NEW #10-32 Manifold Mount Style

NEW NPT Mounted Option with Swivel Output

Medium: Air, Water* or Oil*

Input Pressure: 300 psig max.

Air Flow: 3 scfm @ 50 psig; 5 scfm @ 100 psig

Temperature Range: 32 to 230°F

Mounting: #15/32-32 thread. Nuts and lockwashers furnished

Materials: Brass body, Nitrile seals (FKM optional "-V"), stainless steel stem and spring

Adjustment: By means of a knob with micro-adjustment (40 pitch thread). Screwdriver slot and plastic adjustment versions also available.

1C and 1CP Models: As plunger is depressed, pressure increases proportionally to the travel; when plunger is released the input is closed and the output pressure is exhausted to atmosphere. 7/32" plunger travel.

* Non-Relieving models only

Special Configurations & Assemblies

If you need a product that fits your application perfectly, Clippard has the capability to design or modify one of its products to suit your exact needs. We understand that a standard catalog product may be close but not be exactly what you need. We have the ability and capacity to give you what you want. Our Engineering Department has designed tens of thousands of special variations, modifications or completely special regulators and other products.
