

Date: December 18, 2023

To Our Valued Customers:

Our Company, Clippard Instrument Lab, Inc., is aware of the UK and EU regulations of September 2023 prohibiting the import into those countries of Russian-sourced steel and iron products, including Russian-origin steel and iron incorporated into finished or semifinished products.

Our Company has implemented procedures to understand the origin of steel and iron used in our products and components. We are currently collecting and reviewing mill certifications from our suppliers, and where we purchase finished or semi-finished products which may include steel and iron, we have asked our suppliers to review their supply chains and provide us with assurances that they do not and will not include Russian-sourced steel or iron in its products sold to our companies.

To date, we are not aware of any Russian-sourced metals in our products or in products purchased from our suppliers. We will continue to monitor our suppliers and will take necessary steps to assure that we are not purchasing metals with origin in Russia, and that we are in compliance with the UK and EU restrictions.

Should you have any questions concerning our approach to this matter, please contact Gary Dilonardo, 513-521-4261.

We appreciate your continued support of our products.

Sincerely,

Clippard Instrument Lab, Inc.

Gary Dilonardo

Director of Operations Support
