CLIPPARD TO FEATURE SEVERAL NEW MINIATURE PNEUMATIC VALVES SERIES AT PITTCON

Visit Booth #3619 to learn more about solutions for your pneumatic, motion and process control devices

CINCINNATI, OH—February 27, 2014—Clippard Instrument Laboratory announces they will be featuring several new miniature pneumatic valves at Pittcon at McCormick Place in Chicago, IL March 2-6, 2014. The new valves include the [HV/HTV Valve Series](#), the [GV/GTV Valve Series](#), a new [Push Quick Flow Control Series](#), and an exciting new High Flow Electronic Valve Series.

Clippard has been providing solutions for pneumatic, motion and process control devices to the scientific, medical, dental and analytical markets since 1941. The company excels in understanding OEM needs for precision, reliability and purity in critical applications. Through advanced manufacturing techniques and quality control, Clippard ensures every product meets the highest standards of quality and performance.

Visit Clippard's Booth #3619 at Pittcon to experience the [Clippard pneumatic guitar](#) and see what's new so far this year in miniature pneumatics.

ABOUT CLIPPARD INSTRUMENT LABORATORY

Founded in 1941, Clippard Instrument Laboratory, Inc. has long been recognized as a world leader in manufacturing miniature pneumatic components and devices. No other manufacturer can match their level of experience or knowledge of miniature components. In the early 1950's, Clippard introduced miniature

pneumatic cylinders and valves to the industry. The company's unparalleled history in providing new and innovative products continues today with advanced manufacturing machines and techniques, experienced design applications and engineers, and an experienced work force that strives to exceed customer expectations.
