NEW CLIPPARD ANALYTICAL ELECTRONIC VALVES

Cincinnati, Ohio -- Clippard Instrument Laboratory, Inc. introduces the new Analytical Series electronic valves. Available in 2-way or 3-way, normally-closed or fully ported, the valves are designed for the specific needs of the analytical industry, and for applications where cleanliness is especially important.

The "A-E" Series pneumatic valves utilize a unique patented valve system that has been used and proven throughout many industries. With a low power consumption of only 0.67 watts, a response time of 5 to 10 milliseconds, and voltages of 6, 12, or 24 VDC, these new valves offer unlimited flexibility in design.

Special materials, manufacturing and assembly processes make this valve perfectly-suited for applications where internal cleanliness, bubble-tight operation, and long life are imperative.

For complete details on the "A-E" series electronic valves that provide safety of operation with quick response, low power consumption and long life, visit www.clippard.com/analytical or call 1-877-245-6247.
