## Clippard High Flow 3-Way Electronic Valves

*Cartridge & Manifold Mount with Flows to 70 l/min!*

Cincinnati, Ohio – The DV Series was designed as the next generation of Clippard’s original EV line of popular “Mouse” valves. The DV-3 line of Minimatic® electronic valves are precision-built 3-way control valves, utilizing a unique, patented valving principle. With a solid, sleek design, high flow rates and a cycle life of over a billion, these valves are ideal for many applications across numerous diverse industries. This series is also highly modifiable with many flow, mounting, pressure, voltage, material and other options.

- Industry standard for leak-free operation
- Over 1,000,000,000 cycles
- High flows in a miniature stainless steel design
- Low heat rise/low power and fast response
- Robust stainless steel “Spider” flat armature spring
