CLIPPARD EW SERIES ELECTRONIC VALVES

Cincinnati, Ohio -- Clippard Instrument Laboratory, Inc. introduces the new EW Series electronic valves. Featuring wire leads out of the top of the valve, the EW Series is available in 2-way or 3-way, Normally-Closed or fully-ported.

The EW Series utilizes the same operating functions as Clippard's EV/ET line of electronic valves that have produced billions of cycles of fail-free operation. The EW line offers flexibility in design with its offering of either in-line or manifold mount options, and several DC voltages. Featuring a fast response time of 5 to 10 milliseconds and a power consumption of just 0.67 watts, the EW series is ideal for unlimited applications.

For complete details about the EW Series, or any of Clippard's other products, go to www.clippard.com to [request a catalog](#), or call 1-877-245-6247.
