### CLIPPARD INTRODUCES PUSH/PULL VALVES

*Cincinnati, Ohio* -- Clippard Instrument Laboratory, Inc., introduces a new line of manually-operated Push/Pull Valves.

These new spool valves are available in both 3- and 4- way configurations. Available in detent or momentary versions, these new valves provide the flexibility for unlimited applications. And, with an operating temperature of 32 to 140°F and an operating pressure of 0 to 115 psig, these new valves offer top notch performance where maximum performance and maximum value are demanded.

For complete details or to request a catalog, go to [www.clippard.com/pushpull](http://www.clippard.com/pushpull) or call 1-877-245-6247.
