## Clippard High Resolution Proportional Pressure Controls Receive CE Mark Approval

Cincinnati, Ohio -- Clippard, a manufacturer of Precision Control Solutions, announces receipt of CE Mark approval for its revolutionary Cordis Proportional Pressure Controls.

Known for reliability, innovation and focus on miniature pneumatics, Clippard's micro-controllers utilize the proven EVP and DVP lines of Clippard proportional valves allowing for steady, repeatable downstream pressure as demand or processes change. The result, a precise linear pressure control within a closed-loop system with ultra high resolution and repeatability.

With unparalleled performance and flexibility not possible with current analog proportional controllers, the Cordis makes everything from calibration to sensor variety acceptance to future development opportunities more accessible and less complicated. The future of proportional control has arrived, and it's digital.

- Resolution  $\leq 5$  mV
- Accuracy  $\pm 0.25\%$  of full scale
- Real time adjustable PID control
- Integrated 0 to 4-20 mA signal
- 0 to 10 VDC feedback pressure monitor
- Virtually silent
- No integral bleed required
- Static or dynamic applications with the same proportional control
- Proportional fill and bleed control
- Customizable pressure ranges
- Proudly made in the USA. ISO 9001.

For more information on the new Cordis Pressure Controls or any of Clippard's other 6,000 pneumatic products visit [clippard.com](http://clippard.com) or call 877-245-6247.
