

ECLIPSE

PROPORTIONAL ISOLATION VALVE

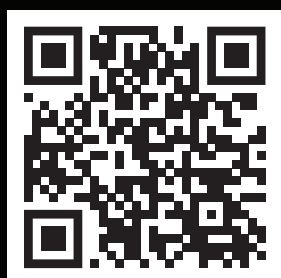

Unrivaled Resolution

The **Clippard Eclipse** is a proportional isolation valve like no other. Utilizing patented slide technology, it achieves exceptional proportional flow resolution that far exceeds the competition. Designed for precision, its flow path is fully flushable and composed entirely of inert ceramic, ensuring compatibility with a wide range of media. In addition, the Eclipse features a unique soft start capability that gradually introduces media at a controlled ramp rate to prevent damage or turbulence.

For applications that demand exceptional liquid or gas control, Clippard's Eclipse offers outstanding precision.

Unrivaled proportional flow resolution

Contact your distributor today to learn more about how the Eclipse can provide precise proportional control for your application, or visit clippard.com for more information.
