

Fill & Bleed Valves

FBV-3DMPFH

Fill and Bleed Valves may be used to pressurize or "fill" a chamber or bladder by depressing the toggle in one direction and then de-pressurize or "bleed" that same chamber or bladder by depressing the toggle in the other direction. Toggling back and forth between the inlet and exhaust provides a fine adjustment of the required pressure in the chamber or bladder.

Actuation	Detented/Momentary
Air Flow	125 l/min @ 50 psig; 210 l/min @ 100 psig
Data Sheet	Data Sheet
Force for Full Stem Travel	8 oz. Nominal
Included Item(s)	Nut & Lockwashers
Input PSI	120 max
Material, Body	Brass Body, Stainless Steel Stem & Spring
Material, Seals	Nitrile
Material, Toggle	Nickel Plated Brass
Medium	Air
Mount	#5/8-32 Thread. Two 0.171" mounting holes in body
Operating Pressure	120 psig max. (8.3 bar)
Ports	1/8" NPT
Product Line Brochure	Mechanical Valves
Weight (lbs.)	0.2100
