

## Pressure Actuated Switches

### MAS-1B2-06-F

**SAS Series** switches utilize a standard sub-miniature single pole double throw (SPDT) electrical switch certified UL and CSA.

Mechanically-operated models are also available which may be used with any Clippard air pilot or push button actuator. The electrical switch is actuated by a lever arm which may be used as a manual override.

**MAS Series** switches utilize a standard miniature single pole double throw (SPDT) electrical switch certified UL, CSA, SEMKO and VDE. They are available in #10-32, M5, manual, and female 1/8-27 NPT ports for direct mounting into manifolds.
