

Shuttle Valves

MSV-1FFF

Shuttle valves feature a shuttle that allows flow from one inlet to the outlet while blocking the other inlet. They may be mounted directly to valves or in-line using the hose barbs.

Force to Shift	1/2 psig approx.
Material, Body	Brass Body & Poppet
Material, Seals	Nitrile
Max. Flow	5.0 scfm @ 50 psig (3,4 bar); 9.5 scfm @ 100 psig (7 bar)
Medium	Air, Water or Oil
Operating Pressure	250 psig (17 bar) max.
Port, Exhaust	Through port where pressure was last applied
Ports (Inlet A / Inlet B / Outlet C)	#10-32 A, B & C Female
Product Line Brochure	Mechanical Valves
Weight (lbs.)	0.0400
