

Miniature Brass Air-Piloted Valves

The PAV Series Normally-Open or Normally-Closed 2-Way valves incorporate an integral pilot actuator that provides a compact assembly and simple installation. The internal valving is similar to the MAV-2 or MAVO-2. They are ideal for remote and miniature applications which require higher air flow and/or lower power.

Accessories	Foot Bracket [Part:FB-1791], Nut & Lockwasher [Part:PAV-MH]
Material, Body	Brass Body, Stainless Steel Stem & Spring
Material, Seals	Nitrile
Medium	Air, Water or Oil
Mount	5/8-32 Thread or #4 Screw
Pilot Pressure	20 psig (1,4 bar) min.
Product Line Brochure	Mechanical Valves
Weight (lbs.)	0.1200
